

Customer Successfully Drilled and Completed First 10K' U-Turn Well in Haynesville Basin

A complex “U-Turn” well profile in one of the most challenging US Land basins was successfully delivered under the operator’s AFE, resulting in savings of 4.81 days.

The operator’s extensive experience in the basin and meticulous planning, combined with H&P’s unwavering commitment to their success were pivotal factors in achieving this outcome.

The winning formula:

- ▶ **Weekly touch points** with the customer and on-site leadership
- ▶ H&P’s Autodriller Pro control system that **managed & optimized parameters** based on area learnings
- ▶ Customer’s **proactive approach** to continuous improvement, adopting new operational practices & equipment to **enhance efficiency**
- ▶ As a pioneer in **performance contracts**, our partnership with this customer laid the groundwork for a proven model that delivers significant customer savings

Quick Facts

- ▶ Basin’s first “U-turn” well
- ▶ Trip durations below target times
- ▶ Longest lateral run (9875 ft)
